

The World's Best Patent Pending Paving Geosynthetic Brush

Invented by Mounque Barazone

2019 Inductee into the Pavement Hall of Fame

Since 1980 Manufacturing The Grizzly 600T "The World's Best"

Multi-Patented Geosynthetic Installation Machine and Roll Pullers™

THERE IS NO OTHER BRUSH LIKE IT AND MADE IN THE USA FOR GAC!

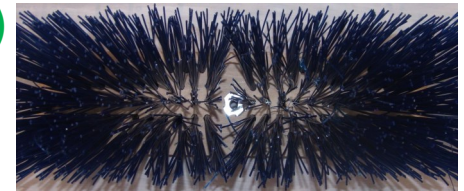

16" - \$39.75 each (6 per box)

24" - \$49.75 each (4 per box)

Filament color may be Blue or White to due to supply chain availability

Plus \$25 handling per shipment and UPS or Freight prepaid or billed to your UPS account

Price Effective June 1, 2022

16" & 24" sizes. 1 1/8 inch thick hardwood block center drilled with a female threaded insert & bolt for attachment to GAC Grizzly 600T installation machines.

These brushes cover more surface area with off set rows of 30% more holes with 30% more filaments. This creates a smoother coverage without filament gaps for wrinkles to get pinched in. The brushes clean up better & last longer because of their higher melt point of 325 degrees. 45 Degrees higher then polypropylene fabrics & 15 degrees higher than ASHTO M288 hot AC oil maximum specification.

For 35 of my 43 years I tried to get a brush manufactured that does not melt at hot asphalt oil temperatures. Finally I invented Polypropylene filaments with a heat treated additive that melt at 325 degrees & not 250 to 285 degrees for Polypropylene. I use a 1 1/8 inch thick hardwood block with a female sleeve & a bolt for attachment. 30% more filaments with each other row offset to prevent pinching of the synthetic between the rows of filaments. A superior brush that performs better, covers a total synthetic surface placement area. A brush that lasts longer & will clean up after use for reusing since it is not melted together.

One June 1 2022 we were forced to increase prices due to inflation & supply chain issues. Wood blocks & filaments have tripled in cost in a year & a half. Supply chain issues with wood blocks & filaments have led to 10 or more weeks backorders. We are currently waiting for our ordered from March.

Since 6/1/21 we have had 4 manufacturer price increases & finally have had to increase prices.

16" packed - 6 per box

24" packed - 4 per box

UPS or Freight Prepaid and Added, or billed direct to your UPS account.

\$25 per shipment handling charge.

15% surcharge for split box orders.

3% Credit Card Convenience Fee.
