PATENT PENDING ARTICULATION CENTER BRUSH MOUNT WITH 4 POSITIONS

The old mount had 2 fixed positions 1. Straight. 2. Patented Chevron Angle. The post has 3 height adjustment holes. The rear mounting tabs are removed and now welded onto a sliding tube with a hole for pinning to 3 holes on the extension post. The patent pending articulating mount can be moved for straight or 3 chevron angles. Geosynthetics have different elongations fabrics (high), GRIDS (low) and HYBRID MATS (low to medium) they require different angles or straight for the brushes. Each material requires some testing to get it right.

FABRIC INSTALL MULTIL-BAR TENSION AND ANGLED BRUSHES	OLD MOUNT 2 POSITIONS - CHEVRON ANGLE & STRAIGHT & ARTICULATING ROCKER	Z BAR POST WITH 3 HOLES FOR MOUNTING THE BRUSH BAR BRACKET \$65.00 REQUIRES WELDING TO ZBAR	NEW MOUNT COMPLETE WITH SLIDER & PIN FOR 3 CHEVRON ANGLES & STRAIGHT \$465.00 EXCLUDES ARTICULATING ROCKER	NEW MOUNT SLIDER WITH 2 TABS FOR ARTICULATING MOUNT & PIN \$140.00 REQUIRES CUTTING OFF TABS	NEW MOUNT WITHOUT SLIDER WITH 3 HOLES FOR SLIDER \$325.00
---	---	--	---	---	--

We offer all the above parts to upgrade you machine. Most machines only need the new sliding tube with tabs and pin hole and a pin. Your shop will need to cut off the back tabs and drill holes on the vertical post. One hole at the end for straight and two more for angles. We also sell the complete new part and you use your patent pending articulating mount. Shipping Is Additional

Patented Multi-Bar Tension System and Patent Pending Multi-Bar Roller System Front Sliders with Patent Pending Adjustment Radius. Permits pinning the slider in various positions from straight and fully or partially extended to various raised angles fully or partially extended for different geosynthetics and roll diameters. It prevents the front PVC Bar or Roller from dropping out of position under a increased loads exerted from heavier or more rigid GeoGrids, Composites and Hybrid Mats.

Set of 3 Laser Cut Radius with Holes for welding on to your front existing 3 PVC Sliders or 3 front Roller Sliders \$105.00 Set of 3. Complete front set of 3 PVC Sliders or 3 Roller Sliders and you reuse your existing neoprene bearings \$295.00

Rotating Spindle roll holder improvements in 2019. Lubricatable heavier duty cast iron bearings. 2 inch longer patent pending 2 step Cone for cores 5 1/4" to 2 1/4" with Keywayed Shaft that fits Laser Cut Machined and Surfaced Discs. Older non hub discs require the replacement of both disc and shaft and cone. Brake pad replace kits and Complete replacement calipers.

Rotating Spindle Roll Holder (RSRH) Complete \$1500.00 each

LUBRICATEABLE HEAVIER DUTY CAST IRON BEARINGS. \$45.00

Machined Laser Cut Disc with Hub \$325.00

Rotating Spindle Roll Holder Shaft and 8 2 Step Blades Cone 2 1/4"-5 1/4" \$350.00

New in 2020. Combination Tractor End Loader Mount and Clamp on Bucket Mount Standard on New All Machines. Prior to 2020 all Cub 300T replacement \$725.00

Rotating Spindle Roll Holder Internal Brake Pad Kit 2 Pads, Pad Pin Hollow Trust Pin, Square Nut, T-Handle Screw, 5 Washers \$95 each

Rotating Spindle Roll Holder Complete Internal Brake Assembly Caliper - Brake Pad Kit, Caliper Arms, Spring, Assembled \$135 each
